

## What I do in the workshop

In the workshop for the past weeks, I did a marking gauge. I made notches and I assembled the pieces together.

I cut wood (machined : usiné) for all the other students because I was ahead.

After doing this I drew the pieces on the wooden boards. Then I cut them out and these pieces will be used to make a dice box.

After that, I did a brain teaser but this has taken such a long time it was not complicated.
